

Spotify- Conceptual Data Model Diagram

Gustavo Gyotoku, Peter Broecker, Tim Tieng | December 11, 2022

Diagram Key

 Proposed table

Diagram Summary:

This is our groups Conceptual Data Model for this project. We will use this as a baseline to create the logical data model. This may introduce schema/relationship changes as the design process progresses.

Our group wants to store user settings and all of the assets (Songs, Podcasts, playlists)

User Stories/Requirements are outlined in another document.

Users	
<i>user_id</i>	INT, PK
<i>user_firstname</i>	VARCHAR(50)
<i>user_lastname</i>	VARCHAR(50)
<i>user_email</i>	VARCHAR(50)
<i>user_password</i>	VARCHAR(50)
** Password Req**	Constraint
<i>user_item_id</i>	INT, connects other tables

Items	
<i>item_id</i>	INT
<i>item_title</i>	VARCHAR(50)
<i>item_genre_name</i>	VARCHAR(50)
<i>item_duration</i>	Time
<i>item_album_name</i>	VARCHAR(50)
<i>item_album_song_count</i>	INT
<i>item_release_date</i>	DATETIME
<i>item_playlist_name</i>	VARCHAR(50)
<i>item_type_id</i>	INT
<i>item_genre_id</i>	INT
<i>item_song_id</i>	INT
<i>item_playlist_id</i>	INT

Items Lookup	
<i>Item_type_id</i>	INT, PK
<i>item_type_name</i>	VARCHAR(50)

User Settings	
<i>setting_id</i>	INT, PK
<i>setting_language</i>	VARCHAR(50)
<i>setting_normalize_volume</i>	BOOLEAN
<i>setting_volume_level</i>	VARCHAR
<i>setting_stream_quality</i>	VARCHAR(50)
<i>setting_user_id</i>	INT, FK

Podcasts	
<i>podcast_ID</i>	INT, PK, Not Null
<i>item_id</i>	INT, Not Null , FK
<i>podcast_title</i>	VARCHAR(50)
<i>podcast_artist</i>	VARCHAR(50)
<i>podcast_episode_number</i>	INT
<i>podcast_description</i>	VARCHAR(50)

Genres Lookup	
<i>genre_id</i>	INT, PK, Not Null
<i>genre_name</i>	VARCHAR(50), Not Null

Playlists	
<i>playlist_id</i>	INT, PK, Not Null
<i>item_id</i>	INT, FK
<i>playlist_user_id</i>	INT, FK
<i>playlist_liked_item_id</i>	INT FK
<i>playlist_liked_item_name</i>	VARCHAR(50)
<i>plalist_creation_date</i>	DATETIME

Songs	
<i>song_id</i>	INT, PK, Not Null
<i>song_name</i>	VARCHAR(50)
<i>song_artist_id</i>	INT, FK, Not Null
<i>song_album_id</i>	INT, FK, Not Null
<i>song_duration</i>	INT Not Null
<i>song_release_date</i>	DATE
<i>song_genre</i>	VARCHAR(50) Not Null
